

Garmin Zumo Configuration Guide

Document Part number 65309R0

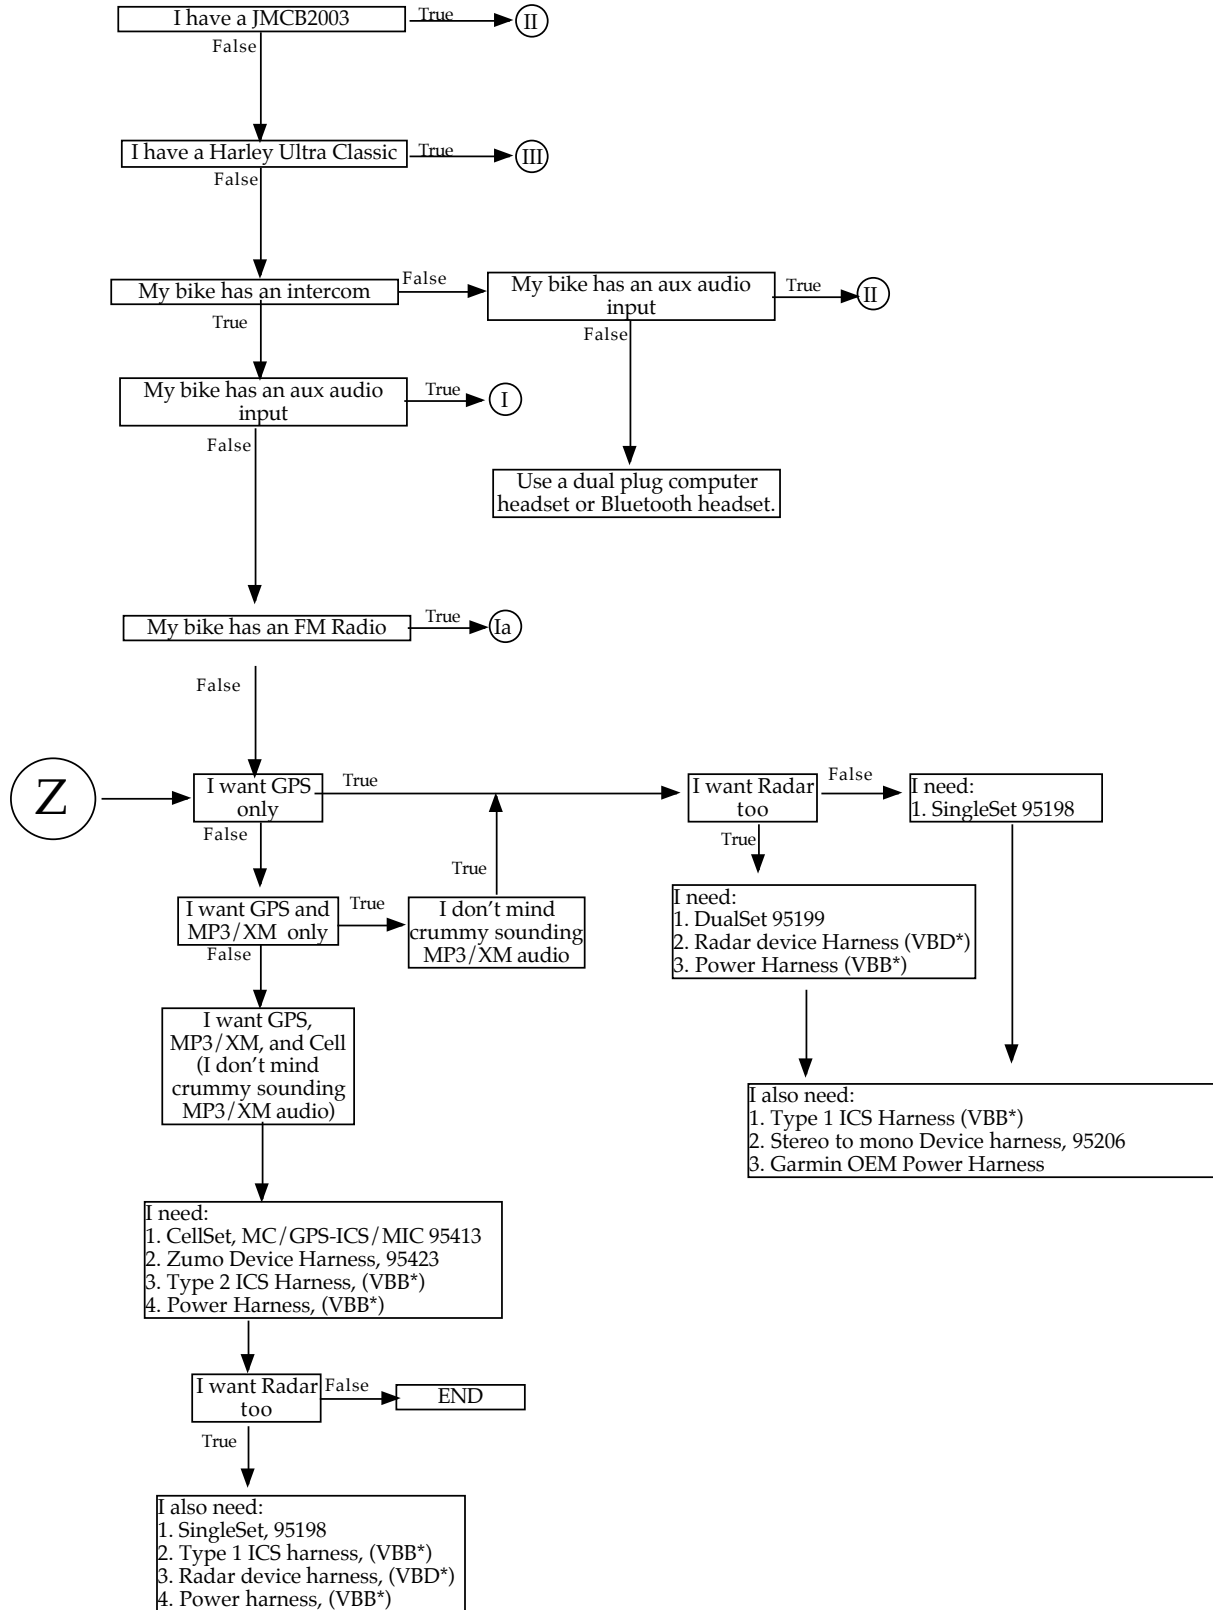

The Zumo outputs GPS alerts, MP3 stereo, XM Radio, and cell phone audio. It is also capable of connecting via Bluetooth to supported cell phones and headsets.

The Zumo motorcycle cradle has four mechanical connectors. The Zumo has two wireless, internal, Bluetooth connections.

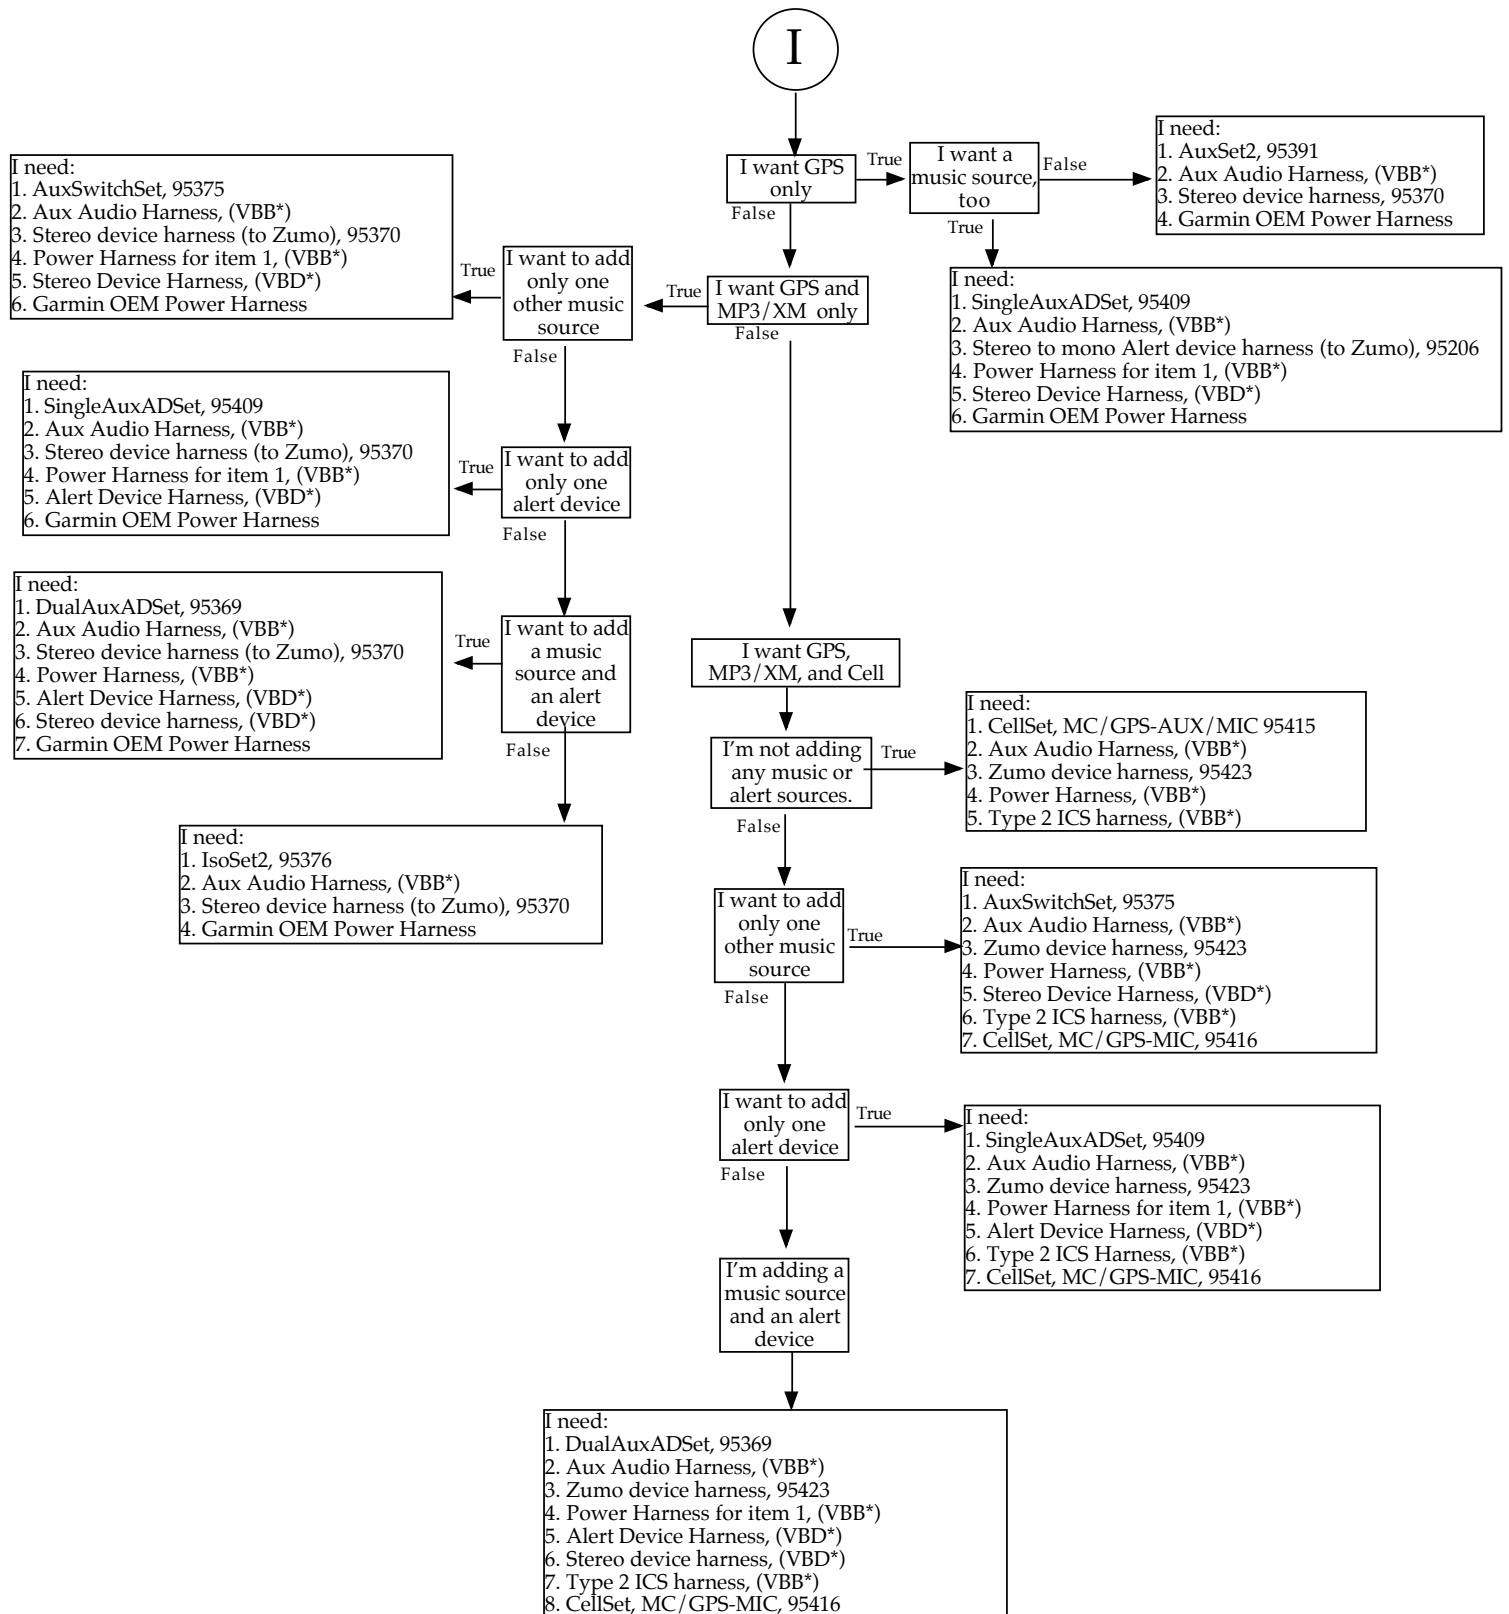

Mechanical Connectors-

1. One 3.5mm stereo jack on its side
Designed to connect to the line input of a stereo amplifier or stereo headphones.
2. One 2.5mm mono jack just above the 3.5mm jack.
Designed to connect to an electret microphone to provide outgoing cell phone audio
3. One round, four pin connector.
Designed to connect to a power source.
4. One proprietary contact strip
Connects Zumo to cradle connectors
